22 May 2014

Ms Kimberley Livingstone
President
Australian Heart/Lung Transplant Association

Dear Kimberley,

Thank you once again for the Association's most generous offer of funding support for our research. There are always so many worthwhile areas in which we can use funds. On this occasion, we have decided to put funds raised by the Association into supporting **Research into Diabetes and Bone Disease** before and after lung transplantation.

You may not be aware that we now have an Endocrine Registrar imbedded in the Unit to help provide hands on care in these two major areas as well as other Endocrine areas such as thyroid hormone abnormalities. This is a joint initiative of A/Prof Jerry Greenfield and myself with some seed funding from the Curran Foundation that has helped us out over the years. However, that funding only pays ½ of the Registrar's salary so the Lung Transplant Unit needs to come up with the other half. We do feel this is a most practical and valuable way to use resources donated by the Association so that the majority of patients will individually receive some benefit. It is just one of the many direct patient care initiatives that we have been working on over the last few years. Another most important one is the development of improved Gynaecological services to our many female patients. Perhaps, we can talk about these issues at another time.

Very best regards,

Yours sincerely,

Allan R Glanville,
MB BS MD FRACP
Consultant Thoracic Physician
Head of Service,
Department of Thoracic Medicine

Immediate Past President International Society for Heart and Lung Transplantation
